**Specialist- Integrated Fire Management for Central America and República Dominicana.**

Andrés Echeverría is an experienced specialist in international emergency response and risk management, with over 15 years of service supporting missions across Latin America for leading humanitarian organizations. His expertise spans humanitarian systems, project management, organizational development, capacity building, and integrated fire management in Central America.

Throughout his career, Echeverría has played key roles during major disasters in the Central America region, providing strategic and analytical support to field teams, volunteers, and senior management. He has contributed to defining objectives, developing effective strategies, and guiding operational decision-making at both local and regional levels.

Echeverría is committed to promoting effective responses to operational and environmental challenges, ensuring resilience and preparedness of vulnerable communities and organizations.
